Full Stack MERN Project Documentation

1. Introduction

• Project Title: [househunt: finding your perfect rental home]

• Team Members: - Lobhisetti Rajesh– Frontend Developer

         - Koushik Eslavath– Backend Developer

         - Kottakota Mounika– Database Designer

         - Karnati Jyothi Swaroop Reddy– Full Stack Lead

2. Project Overview

• Purpose: Describe the purpose and goals of the project.

• Features: - User authentication - CRUD functionality - Admin panel - Responsive UI - API integration**3.**

Architecture

• Frontend: Built using React with routing and state management.

• Backend: Node.js with Express.js for RESTful APIs.

• Database: MongoDB with Mongoose for schema modeling.

4. Setup Instructions

• Prerequisites: - Node.js - MongoDB - Git

• Installation: - Clone the repository - Install dependencies using npm - Set up .env file - Start frontend and backend servers

5. Folder Structure

• Client: - /src/components - /src/pages - App.js, index.js

• Server: - /controllers - /models - /routes - server.js, .env

6. Running the Application

Frontend: Run `npm start` in the client directory.
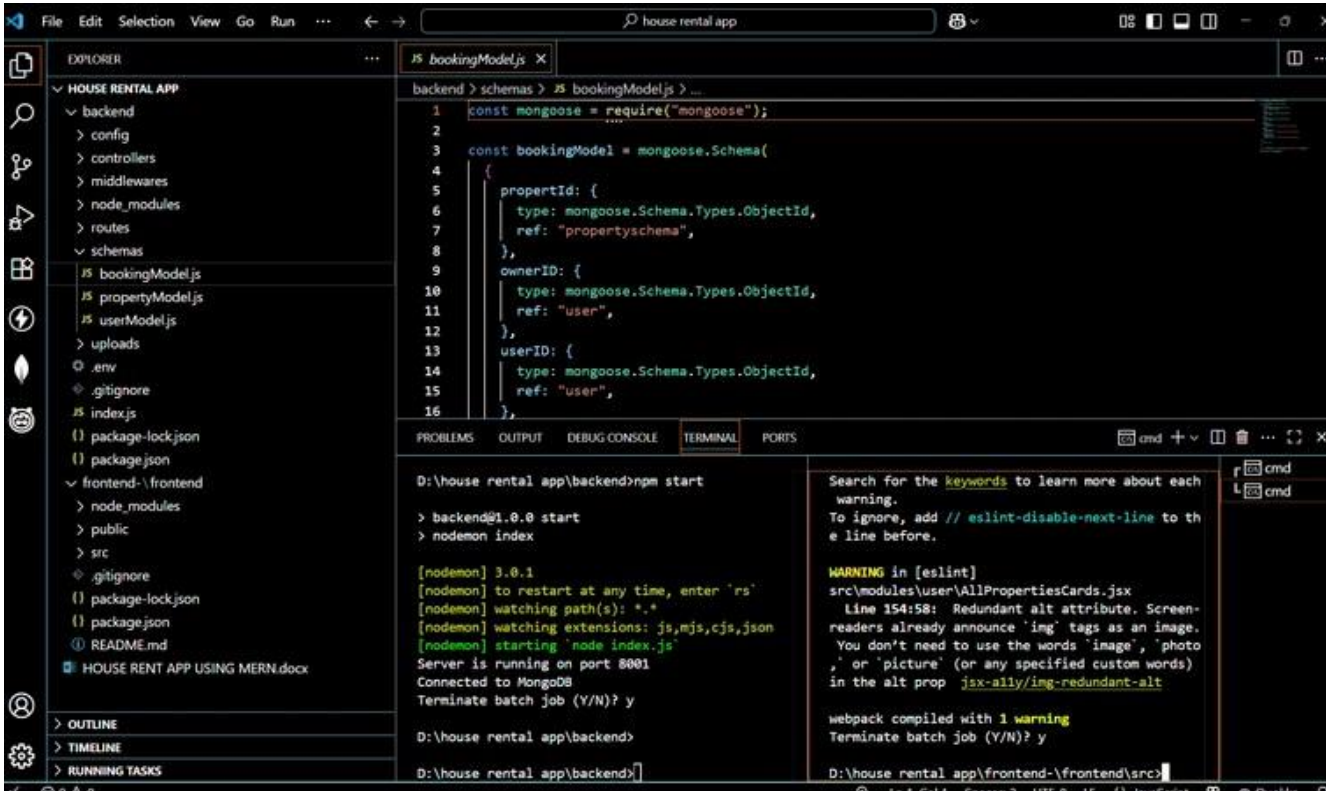

Backend: Run `npm start` in the server directory.

7. API Documentation

Example:POST /api/users/registerRequest Body:{ "name": "John", "email": "john@example.com", "password": "123456"}

## 8. Authentication

JWT-based authentication with protected routes.
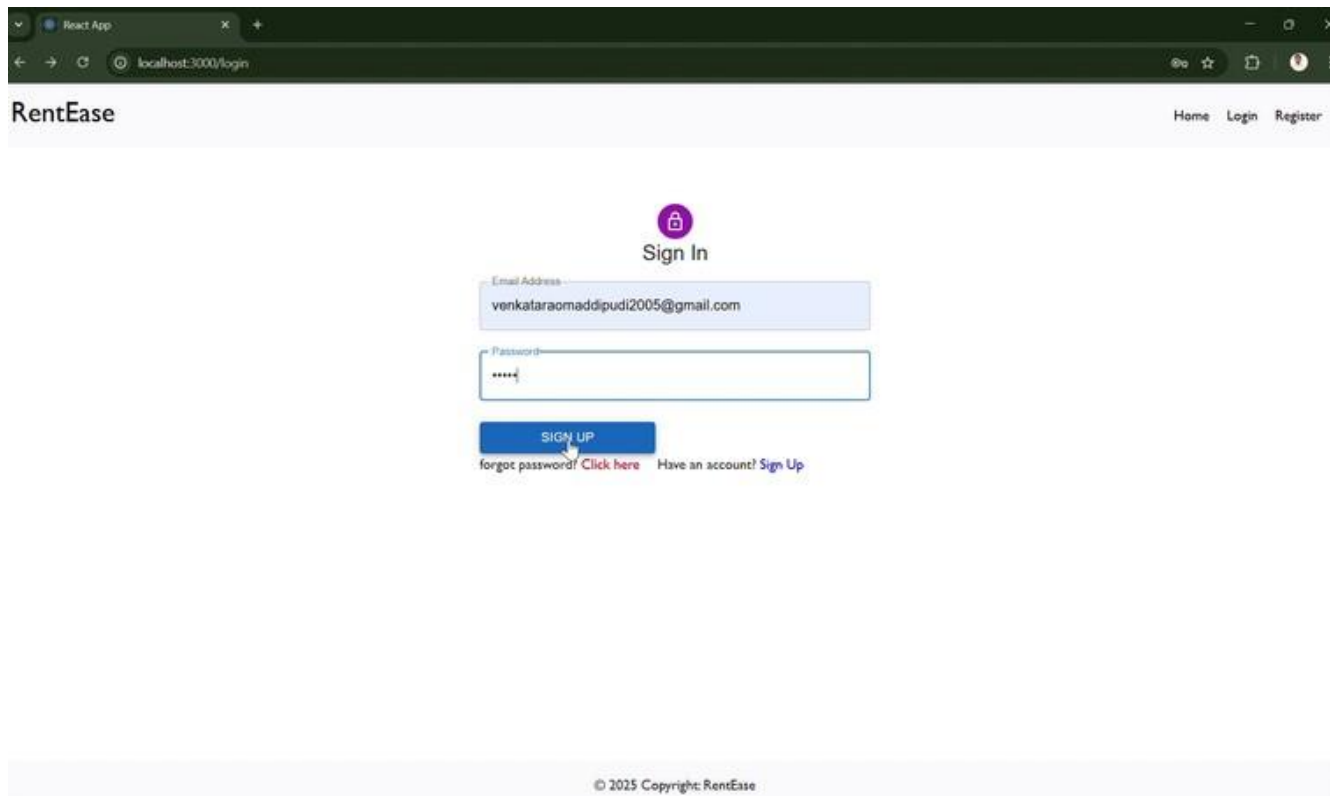

9. User Interface
